

And here is the small error I get upon running the program (It's a new program I created) valgrind 'ps' ==10548== Invalid free() / delete / delete[] / realloc() / calloc() ==10548== in ./lib/xtlib/xtlib.c:1794 ==10548== Invalid free() / delete / delete[] / realloc() / calloc() ==10548== in ./lib/xtlib/xtlib.c:1794 ==10548== Invalid free() / delete / delete[] / realloc() / calloc() ==10548== in ./lib/xtlib/xtlib.c:1794 A: The problem you're experiencing is very likely that you are getting a pointer error. For example, in the line CMenu\* menu\_items\_2[3]; You're allocating an array with 3 elements; but in the line menu\_items\_2[0] = (CMenu\*) malloc(sizeof(CMenu)); You're trying to allocate the maximum size of that array, which is 3, but you haven't defined the variable menu\_items\_2 at all, so it should be a typo. Fixing that will likely fix the problem, but the next question you need to ask yourself is if CMenu is the right type for you. It looks like that can be either a C string (preferably), or a C++ string (in C++) (which is not a good idea). You should probably be using something more appropriate for your needs, like std::string, for example. You also may be able to find help here. What happens if we get stuck in a cold war? It's an awkward question. But if we don't have words to describe our disagreement, we can't understand each other. A recent report by a group of scholars and government analysts makes a convincing case that the two sides are stuck in a "cold war" over climate change. And it
